

Acknowledgements

The Purdue Technical Assistance Program, under the direction of Dr. David R. McKinnis, would like to acknowledge the support of the U.S. Department of Labor and the North-Central Indiana Workforce Innovation in Regional Economic Development (NCI WIRED) program that has been instrumental in developing materials for the Purdue TAP Green Enterprise Development program.

Special recognition is extended to Dr. Rodney Handy who initiated the project and led the development of the body of knowledge upon which the program is based. We also wish to thank Dr. Loring Nies and Dr. Michael Whitt for their contributions to the development of these materials.

The Green Enterprise Development program was developed by a team of faculty and students from the West Lafayette campus, and staff and contractors from Purdue University Technical Assistance Program (TAP) Energy Efficiency & Sustainability program. Key members from the team are identified below.

Faculty

Dr. Rodney G. Handy
Associate Professor, Purdue University
Ph.D. Environmental Engineering
Certified Industrial Hygienist

Dr. Loring Nies
Professor, Purdue University
Ph.D. Environmental Engineering

Dr. Michael Whitt
Assistant Professor, Purdue University
Ph.D. Biomedical Engineering

TAP EES Staff

Ethan Rogers, CEM
Manager, TAP EES

Jon Guenin, PE, CEM
Industrial Energy Specialist

Cathy Frint
Frint Consulting

We would also like to acknowledge the partnership with the Society of Manufacturing Engineers (SME). Their team, led by Kris Naisiatka, was responsible for validating the body of knowledge and developing the SME Green Manufacturing Specialist Certificate accreditation.

For more information on Green Enterprise Development, see our brochures & literature by clicking [here](#).
