Green Enterprise Development

Green Manufacturing Generalist

Learn green concepts and the components of sustainability online, at your own pace.

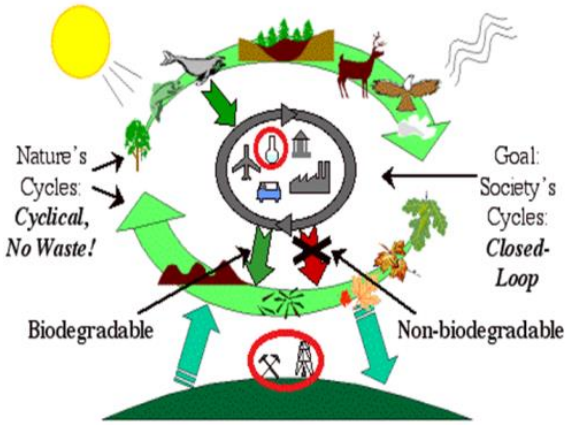
The Purdue Technical Assistance Program offers the Green Manufacturing Generalist workshop as an interactive and educational online course that provides awareness of the many topics and issues of sustainability. Now, you can learn how to apply environmentally friendly practices in the workplace…on your schedule.

The Green Manufacturing Generalist course is comprised of seven sections, seven tests, and three interactive simulations that embed the concepts of sustainability through example. The course takes up to four hours to complete and your account will be active for six months from the date you register.

Through the online simulation, you will learn how one company implements specific changes, and how these produce positive results for employees, customers, and company profitability.

Learn general awareness on:

- What is "Green?"
- Sustainability and Global Conditions
- Material and Solid Waste Management
- Energy Management
- Chemical Waste Generation / Green Chemistry
- Climate / Air Emissions Management
- Supply Water / Wastewater Management
- Environmental Business Management



Registration: Visit www.mep.purdue.edu/events under Green Enterprise Development

Cost: $99
